New York City, NY | +1 646-436-8686 | ar2663@cornell.edu | [LinkedIn](#)

EDUCATION

Cornell SC Johnson College of Business | Cornell University

New York, NY

Master of Business Administration, STEM Designated; Merit Scholar; GPA 3.6/4.0

05/2027

President, Fintech Club. Coursework: Product Management, Machine Learning Applications, Data Analytics, Entrepreneurial Finance

JSS Science & Technology University

India

Bachelor of Engineering, CGPA 8.6/10

05/2020

SKILLS

Product: roadmapping, product requirements documents, customer discovery, prioritization and tradeoffs, experimentation, go to market

Technical: SQL, Python, REST APIs, machine learning applications, model evaluation, system design

Analytics: Mixpanel, Google Analytics, Tableau

PROFESSIONAL EXPERIENCE

IDfy

Mumbai, India

India's leading risk intelligence and fraud detection platform for enterprises.

Founding Product Manager

04/2023 to 05/2026

Transaction Intelligence: machine learning product generating 300+ credit decisioning signals for lender underwriting teams

- Proposed and launched Transaction Intelligence to 7M+ loan applications and \$550K annual run rate in 20 months by owning roadmap and product requirements end to end from customer discovery through go to market.
- Raised product accuracy from 68% to 94% within 8 months of launch by building a champion challenger experimentation and data annotation loop across 3 sequential machine learning models with the ML and Analytics teams.
- Scaled the product pod from 2 to 17 engineers, ML scientists, and analysts alongside the Tech Lead by defining the hiring plan and presenting roadmap tradeoffs to the CEO in monthly business reviews.
- Cut lender underwriting review from 2 to 3 hours to under 20 minutes for 78% of applications by turning discovery interviews with risk teams at 20+ lenders into 300+ prioritized credit decisioning signals.
- Converted 48 qualified leads into 12 enterprise customers over 20 months, a 25% close rate, by building the lead generation to conversion funnel cross functionally with Brand, Content, and Sales.

Site Scan: merchant category classification product for Razorpay, India's largest payment gateway

- Onboarded 4M+ merchants over 3 years to Mastercard and Visa compliance standards by launching the merchant category classification product from 0 to 1.
- Reduced manual merchant review for onboarding teams from 8 to 10 minutes to under 2 minutes per merchant and reached \$200K annual run rate by defining the classification taxonomy and accuracy thresholds with the customer's risk team.

Salesroom

Bengaluru, India

Pre-sales cataloging and contract platform for high SKU exporters.

Co-founder, incubated at IIM Bangalore (acqui-hired by IDfy)

11/2021 to 03/2023

- Drove acqui-hire by IDfy within 18 months by scaling the platform to 40+ enterprise customers and \$70K annual recurring revenue in the first 10 months after launch.
- Ran the end to end product and sales funnel across roughly 50 piloted accounts, from customer interviews through pricing, pilot design, and contract close.

Hewlett Packard Enterprise

Bengaluru, India

Software Engineer 1

01/2020 to 11/2021

- Automated security validation and reboot recovery workflows for enterprise wireless networking devices by building test and release tooling in Python and JavaScript.

PATENTS

- Context-Classified Transaction Categorization using sequential machine learning models. System patent filed, IND202521127036.
- Automated Feedback for Machine Learning Model Training Supervised by Large Language Models. Process patent filed, IND202521127035.
- RFID-Based Offline Payment System enabling transactions in low connectivity rural environments. Patent granted, IND201941031689.

ADDITIONAL

Trekking: completed 4 high altitude treks including Brahmatal and Kedarkantha in the Himalayas.
